

**NOON**

With light fittings in 200 different colors, Noon offers a whole new freedom of choice in the lighting industry.

#### Colour Flexibility

Noon offers a whole new freedom of choice in the lighting industry. Choose from a multitude of colors. Let light fittings in all the colours of the rainbow contribute to unique interiors.

#### Design

Together with other designers, Noon, under the artistic direction of Alexander Lervik, will offer lighting for both home and public environments.

Classic shapes and experimentally challenging light art capture the strengths of Scandinavian design: a diversity of expression and a focus on good design.

Noon makes the choice of different colors an integral part of the design: black, white and grey luminaires are a thing of the past.

#### Innovation

Noon offers the very latest technological innovations together with a truly circular production.

## 02

### Castor

Reinventing the classic cone-shaped lampshade by making suspension and power supply part of the design.

## 22

### Pan Pendant

A cap that grips, and a brilliant form that wants to break free.

## 36

### Ori

The classic desk lamp is transformed into a light sculpture in Alexander Lervik's Ori.

## 48

### RAL - Colors

Choose from 200 different RAL colors

## 12

### Dia

With the light source hidden in the lamp holder, an illusion of shape and light is created.

## 30

### Pan Wall

A cap that grips, and a brilliant form that wants to break free.

## 42

### Juno

The illusion of a line that starts at a wall socket and climbs along the wall, where it turns into a light sculpture.

## 50

### Cable colors

Choose from our textile cables.

Product:  
Castor

Product type:  
Pendant lighting

Designer:  
Alexander Lervik

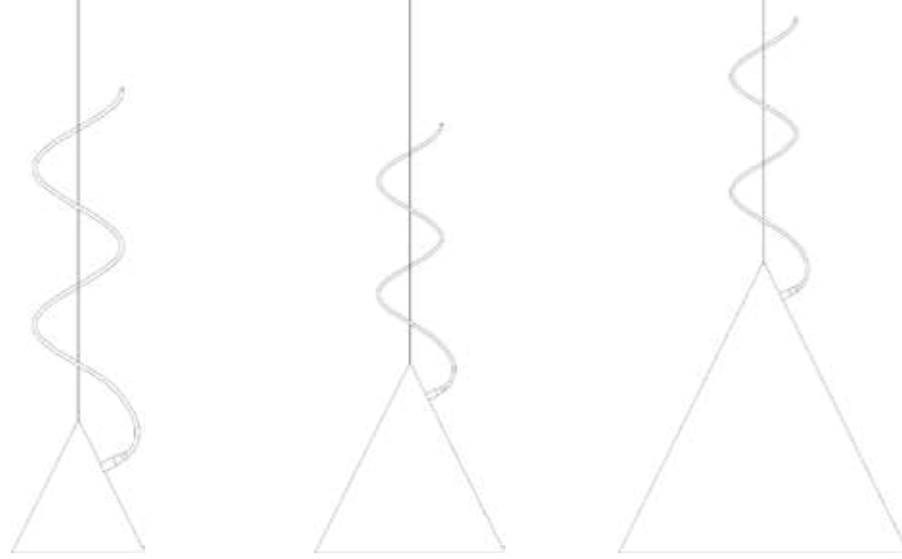

# Castor

Minimalistic shape with many possibilities

Castor reinvents the classic cone-shaped lampshade. By making the suspension and power supply part of the design, Alexander Lervik allows the shape to be even more sparingly precise. Why not a black shade with a red cable? Or a green with yellow? Three different sizes for different placements.

Instead of a limited choice between a few colors, Castor offers full color flexibility and completely new interior design possibilities. Choose from **200 different colors** that can be adapted to both existing and new interiors. The shades have a diameter of 60, 40 and 20 centimeters. The pre-assembled dimmable LED light engine is available for standard connection, DALI or Casambi/Bluetooth. The power supply cable runs out of the screen through a cartridge-like solid sleeve with an alternating polished and matte finish, and then travels up a suspension cable in brass, steel or black lacquered metal. Small clips fix the diameter of the spiral according to taste. Colored textile cable is available in different colors.

Textile cable: 60 colors, see page 50  
Wire: champagne, silver, black

Metal pipe: champagne, silver, black

Why not a violet blue lampshade with a red cable? Or an oxidized red one with an orange cable? The possibilities are almost endless.

You can choose a blue lamp shade with a blue cable? Or an oxidized red with a blue cable? The flexibility in choosing appearance is great.

Product:  
Dia

Product category:  
Pendant lighting

Designer:  
Alexander Lervik

# Dia

With the light source hidden in the lamp fixture, an illusion of form and light is created.

The mouth blown clear glass dome's sandblasted base shines bright and strong as if it were the light source itself. Alexander Lervik's Dia hides the light source in the lamp holder and allows the frosted bottom of the mouth blown clear glass dome to act as a diffusing light surface.

Dia has a diameter of 27 centimeters and provides a well-focused light image. The lamp holder can be ordered with the power cable in different colors and gives Dia a clear contrasting identity.

Dia 27

---

Choose a salmon-pink lamp holder with a pink cable? Or one in red with a red cable? Match it with your other decor for the sake of the experience.

Noon gives you the opportunity to create almost freely. Why not a purple lamp holder with a raspberry-colored cable? Or an olive green one with a pink cable?

Add color with a green-beige lamp holder and a light green cable? Noon gives you the option of several other combination suggestions? The choice is yours.

## Pan Pendant

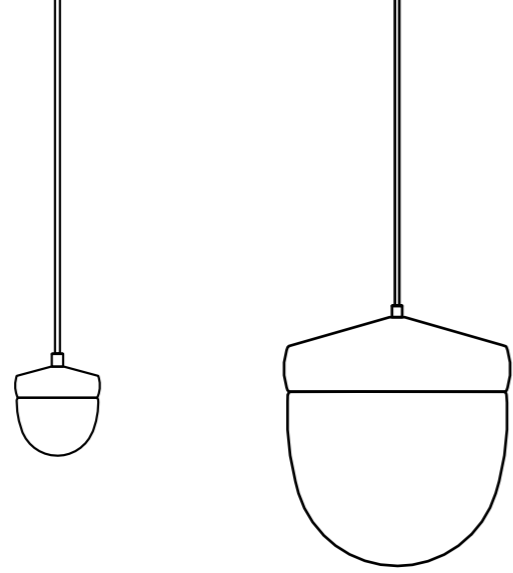

Glass shade with organic shapes

Pan brings to mind children's books and nature: with its organic shapes, it reminds us of glassblowers and acorns. The glass shade in mouth-blown opaque or clear glass can be fitted with either a classic light bulb or a diffusing light bulb globe to further enhance the shapes.

Choose from 200 different colours, or group several Pan in all the colours of the rainbow. Pan is available in 2 sizes with diameters of 10 and 30 centimetres. The characteristic cap has a textured coating that enhances the organic expression.

Choose the colour according to your taste, and why not combine several different colours? The pan is fitted with a G9 or an E27 base and is dimmable (only with dimmable LED bulb).

## Pan Wall

Glass shade with organic shapes

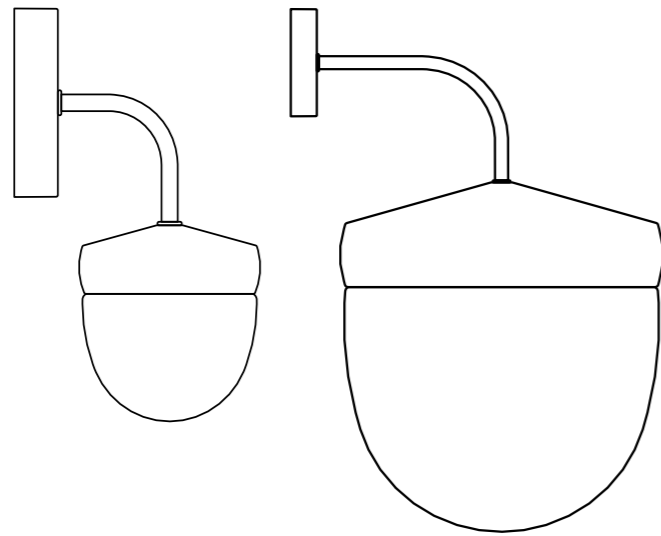

Pan brings to mind children's books and nature: with its organic shapes, it reminds us of glassblowers and acorns. The glass shade in mouth-blown opaque or clear glass can be fitted with either a classic incandescent lamp or a diffused lamp globe to further enhance the shapes.

Choose from 200 different colors, or group several Pan in all the colors of the rainbow. Pan is available in 2 sizes with diameters of 10 and 30 centimeters. Thanks to the IP44 rating, the lamp works equally well outdoors and indoors, and of course also in wet rooms. The characteristic cap has a heavy textured paint that enhances the organic expression. Choose the color according to your taste, and why not combine several different colors?

Product:  
Ori

Product type:  
Table lamp

Designer:  
Alexander Lervik

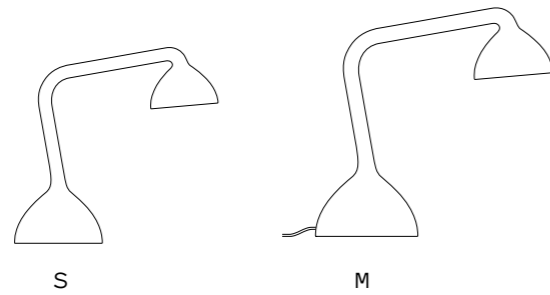

## Ori

The desk lamp is transformed into a light sculpture

What was once steel and sheet metal is resurrected as a paraphrase of both the Anglepoise lamp of the 1930s and the rice lamps popularised in Sweden in the 1970s.

Ori is something of a small sculpture, a bit like a fairy taking shape in the mist. The entire inner workings is filled with small LED lamps that provide an evenly distributed light.

Ori is a light artwork that, unlike NOON's other lamps, is available in only one color—or rather, only as light, all colors at once. With its distinctive form, Ori reconnects to modernist design classics without being constrained by outdated technology. In Alexander Lervik's interpretation, light takes center stage. The lamp body is made of metal wire (Ø4 mm), and the shade material is white stretch nylon. Ori is available in two sizes: Medio Stretch (M) as a table lamp and Portable Stretch (S) with a battery for free placement.

# Juno

Art and technology in one line

Juno's profile is as simple as a line drawing. Juno can be swung out to provide direct light on a dining table or desk, or dimmed down to provide cosy lighting over a sofa, bookshelf or facing the wall. Artwork or practical lighting? Or both?

Juno consists of a cable, a wall bracket and a balancing arm that moves freely in the room like a mobile sculpture. Use Juno to provide direct light on a dining table or desk, or as dimmable cosy lighting over a sofa, bookshelf or facing a wall. With a choice of 200 colours, Juno can blend in or provide contrast in all types of interiors. A sober textured finish enhances Juno's tactility.

| Color rendering (CRI)        | >80                       |
| Light distribution           | N/A                       |
| General Stand. and Cert.     | EU: CE-LVD / REACH / RoHS |

Wall lamp: 200 different colors, see page 48

Textile cable: see page 50

Noon wants to make it easier for you to choose color combinations. Why not a blue lamp with a light green cable? Or a purple one in a monochrome version? Lamp and textile cable can be easily matched with new or old furnishings.

# Ral-colors

Over 200 choices

With 200 different color shades for painted surfaces and 60 different textile cable colors, Noon offers as many as 12,000 color combinations: maximum color flexibility unparalleled in the lighting industry. Let the lamps match the color scheme of the walls, or let the textile cable match the color of the ceiling. Or give lamps and textile cables the chance to set the tone for an interior's accent colors.

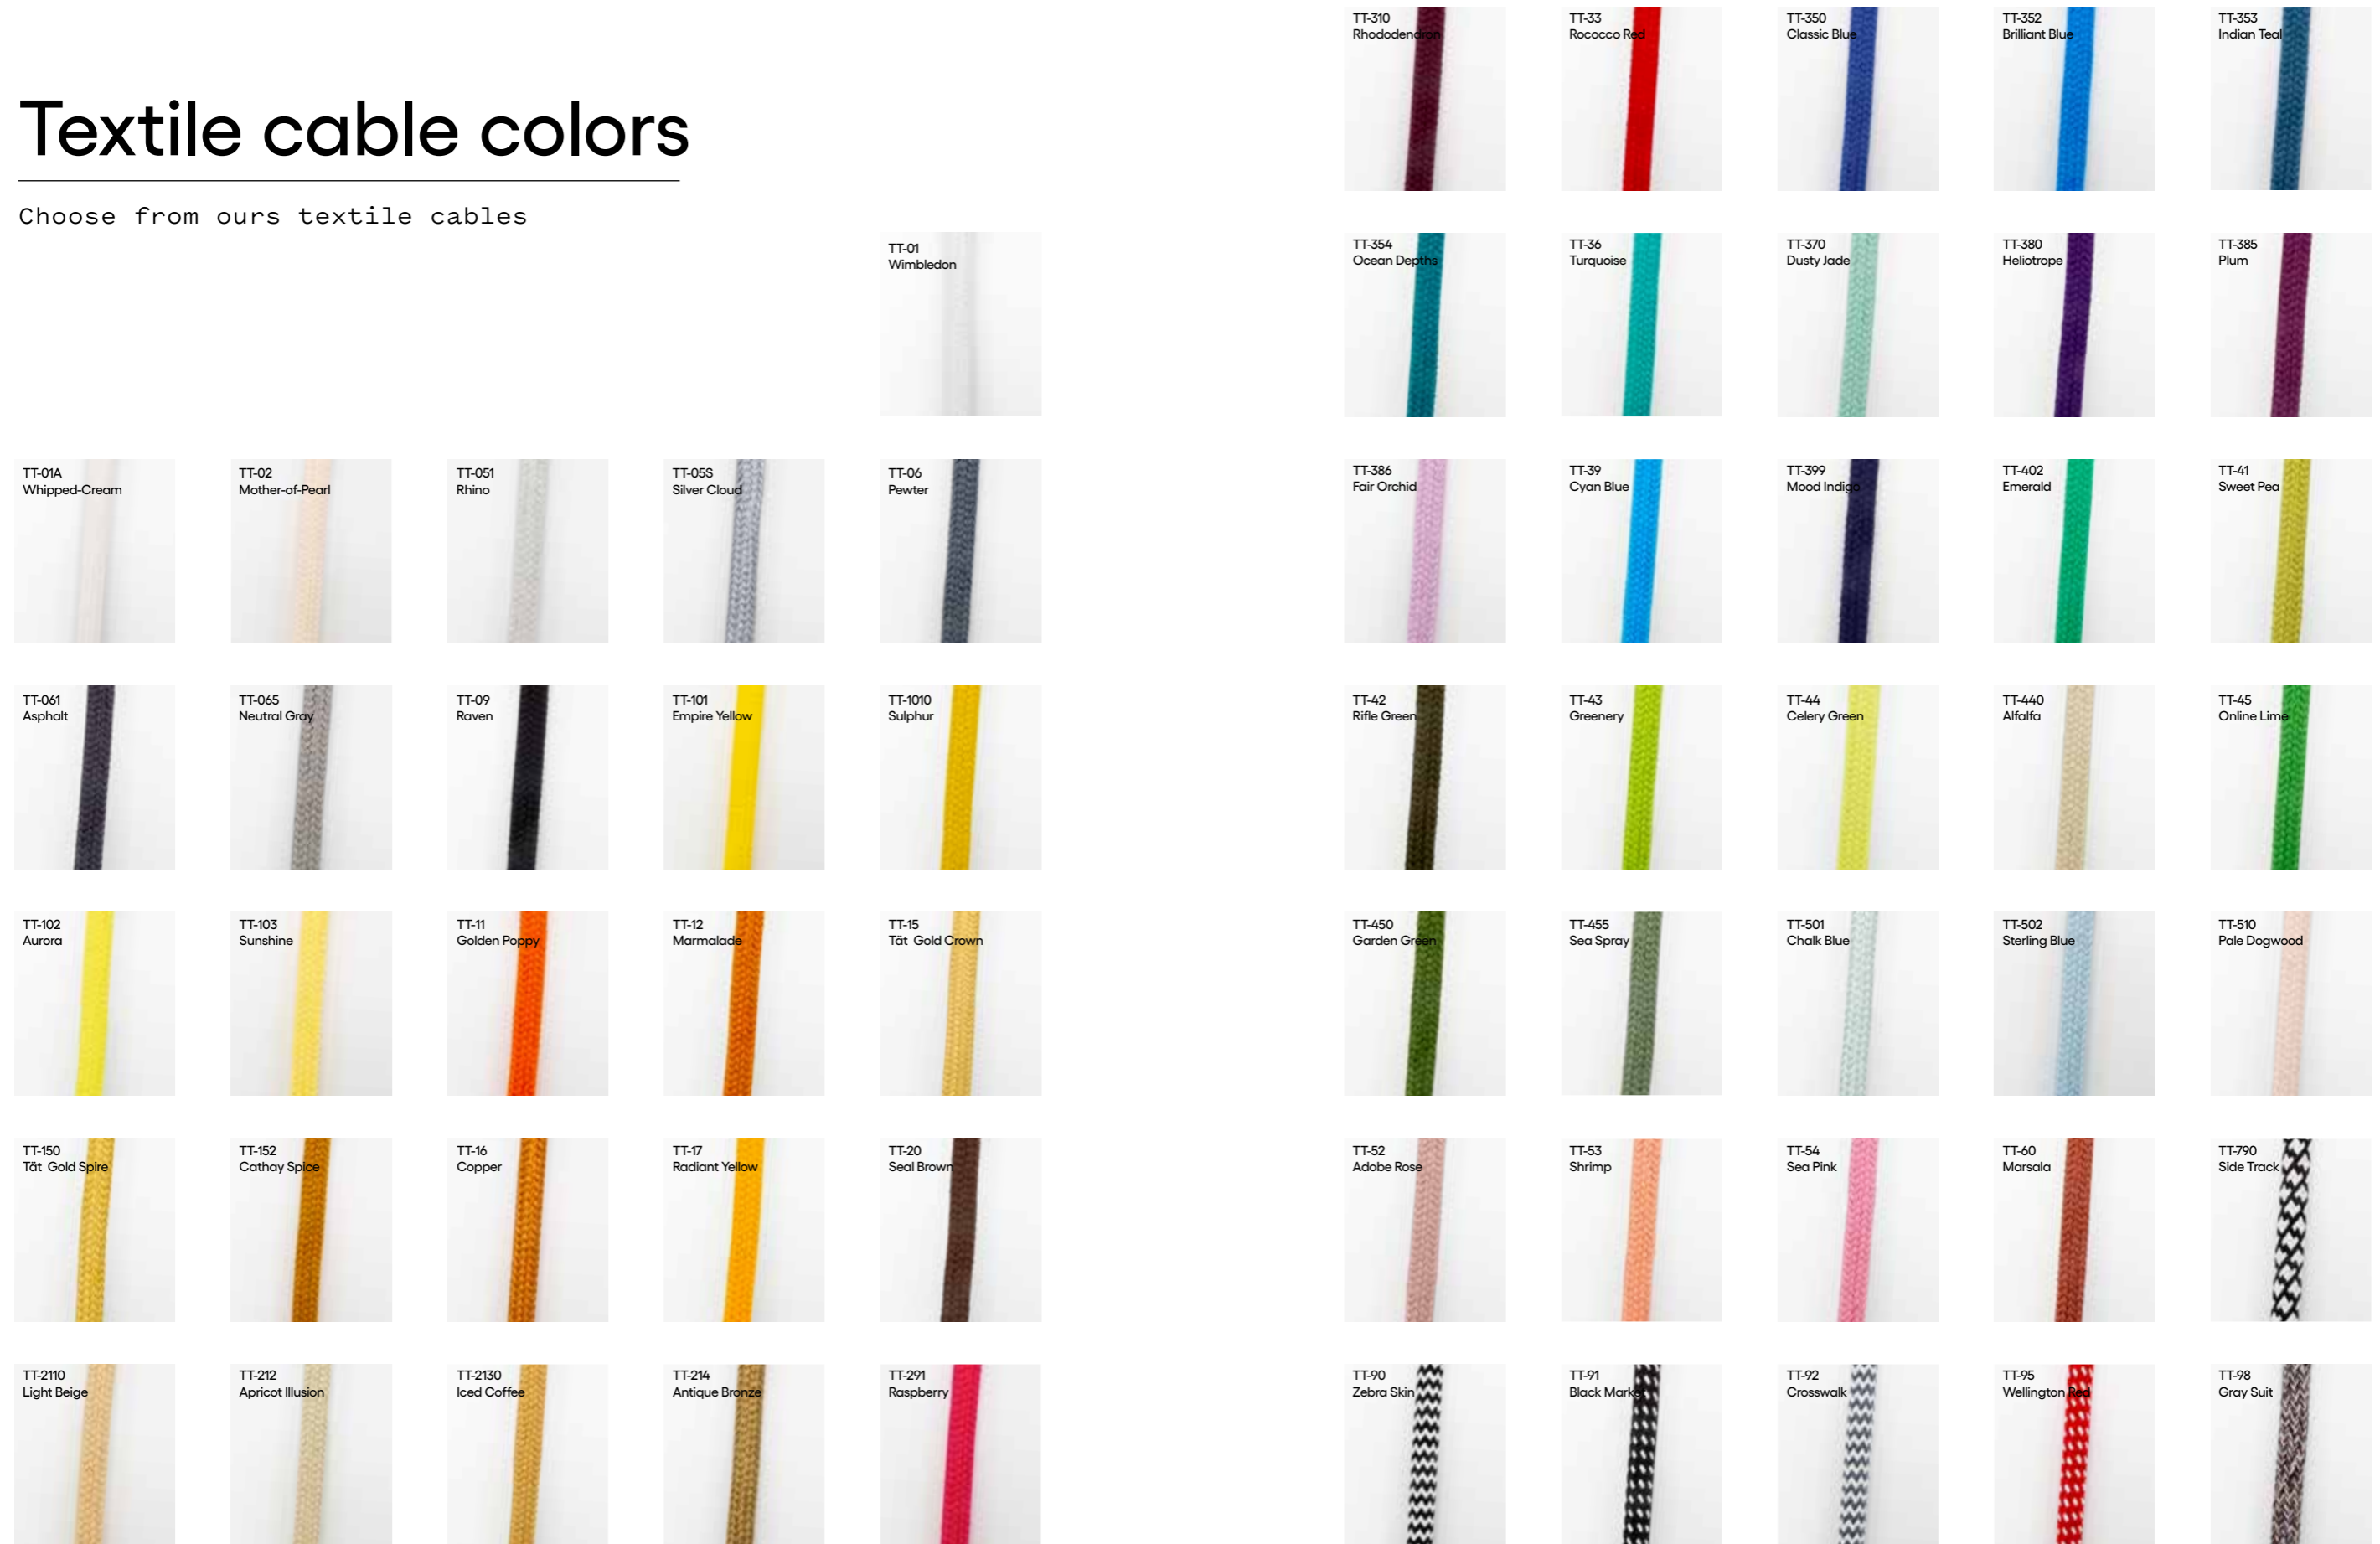

With us, you can choose colors that match your project without having to compromise.
